 **Think Secure. This email is from an external source.**

No, we don't offer anything like that. And Q2 2023 I think may be a decent estimate assuming all goes well, but with it being at EPA HQ and me not being in the loop on it, that's purely unofficial conjecture on my part.

Brandon

Hey Brandon, does EPA R6 happen to have an expedited review process for Class VI review by chance? I know the LADNR does (escrow acct set up to reimburse staff for overtime etc)– and I just got some info on that for if/when State Class VI Primacy is gained in 2023? Any updates on that timeline by the way? I am hearing Q2 23 still.
